Principal's News

Tuesday 4 June 2019

The cold weather has certainly leapt upon us this week and I am sure there would have been a lot of children struggling to find their school jumpers this morning. This would be due to the ever growing pile of jumpers found in the lost property pile or left on seats around the school. Teachers have been reminding the children but unfortunately the pile continues to grow.

With the weather getting colder and the number of illnesses going around, it is important to remind your child to put their jumpers in their bags when they take them off and bring them home.

If your child is absent due to illness, it is important to let the school know. The Department of Education requires school to keep a record of student absences with reasons why they are not at school. If your child is away, you can send a note with them on their return, or contact the school after 8:30am.

National Consistent Collection of Data (NCCD)

The nationally consistent approach to data collection provides all Australian schools, education authorities and the community with a clear picture of the number of students receiving educational adjustments in schools, and the levels of adjustment they are provided to enable them to participate in education on the same basis as other students. We will be completing our survey before the end of the term.

If you would like to know more about the NCCD, please visit the link below.

This Thursday's assembly at 1.45 pm will be led by KD. All families are welcome to attend.

Excursion Reminder

Year 3 Kianinny and Year 5 Berry Sport and Rec Excursion deposits are due by **Friday 7 June**. Year 6 Sydney Excursion is due by **Friday 14 June** and Year 4 Wollongong Excursion is due by **Friday 28 June**.

The media group have followed up last week's photo gallery of our Special Interest Groups with some reports:

Our Own Lego Masters

Firstly Mrs Enright sent her students to the 'brickpit' to begin a free hand build. That means, they could create anything and we saw some amazing builds even a skyscraper and cars.

Most of the students have watched 'Lego Masters'. We will visit again when all the builds are complete so more photos to come.

Students Become Teachers

Every Friday, Mr West and Year 5 & 6 students are teaching Year 2 students athletic skills.

From what we saw, the younger students were really enjoying themselves as they master and practice new skills. One Year 6 student reported that the best part was interacting and becoming friends with the younger students.

Mess and Fun equals Clay

One SIG is using clay to make sculptures. When we visited the room we saw dirty hands and clay everywhere but some great pots and sculptures. Mrs Parker's pottery group looked like they were having fun so stay tuned for more photos when the pots come out of the kiln. Did you know? If the clay dries out while you are working with it, all you have to do is slowly add water to make it soft again.

More to Music

Mrs Mulcahy's music group are focussing on body percussion, beat and rhythms from different countries. Wow!, they are also learning how to read music. Can you? Some students said that music puts them in a good mood. Others said playing a musical instrument was a dream they had. Let's hope the group play something on assembly one week.

Southern Stars Here We Come

Over 30 students have chosen dance for SIG. These students will be heading off to Wollongong next term to take part in the Southern Stars. Now they are practising different types of lifts under the closer supervision of Mrs Fairweather and Mrs Lassau. They are so clever. Next they will put together a whole dance routine which we hope they will perform at our assembly. Keep up the hard work.

Scratch is not just a cut

Mr Hicks has been teaching students 'scratch', a computer coding program. So far they're doing the easy stuff but he assured us it was going to get harder. Students that do scratch have been enjoying themselves as they make virtual erupting volcanoes and rockets that launch. Now the challenge is on for them to be creative and create a game. Good luck guys.

Upcoming Events – Click on link below to see our Calendar
<http://www.brouleepublicschool.nsw.edu.au/broulee-ps-calendar.html>

Grow Garden Grow

We had plenty of students in Mrs Bourke and Mrs Hank's gardening group who wanted to tell us about their work. They are responsible for the care of our vegetable boxes where carrots, beetroot, beans and garlic have been planted. The garden needs to be weeded, watered and mulch added. They have also discovered insects, frogs and worms living in our gardens. When harvested, most of the crops will go to the canteen to make fresh yummy food for us to buy and EAT!!!

Robotics

We were blown away with what the students in the robotic group are able to achieve. They have built elephants, cars, robots, machines that lift heavy items and windmills with gears. It takes them about four weeks to complete their build and the best part is trying to solve any problems that they encounter. Mr Hounsell's robotic group are definitely focussed and determined to succeed; great skills to have.

Stop What??

Stop Motion is what Mr Watt's group is all about and for those who do not know, it is about making movies. The students use the iPads to make their movie and the most important thing to remember is the iPad has to be in exactly the same spot for each and every photo. Students use lego, small cars, drawings or whatever they want to make their movies. We will have to make sure Mr Watts publishes the finished movies on our school's website so we can all enjoy them.
